Attn: Rebecca Hendricks

**Role of Harbor Offshore, Inc.:**

Prime Contractor; Marine Construction.

All (100%) Marine Construction portion of the project performed by Harbor Offshore, Inc.

**Date Started:** January 2006

**Date Completed:** March 2006

*Priest Rapids Dam Spillway Repairs*

**General scope of the project:**

HOI was awarded a contract for the removal of debris on the dam spillway and repair of the damaged concrete within the seasonal fish closure timeline without posing a threat to the sensitive environmental zones adjacent to the project site.

**The nature of the work that was performed:**

HOI personnel were tasked with conducting various modes of underwater construction in order to meet the stringent project timeline and meet the client's needs. HOI divers conducted underwater surveys, removed 8'+ boulders from the project site, conducted 25k hydroblasting operations, performed numerous pneumatic chipping/drilling patterns, installed rebar cages, installed/custom fit forms as needed, and conducted sequential underwater concrete pours utilizing boom trucks to deliver grout to limited access locations.
